OUTDOOR BARBEQUE FIREPLACES

[www.buschbeck.com.au](http://www.buschbeck.com.au)

## Production

Buschbeck fires are designed and manufactured in a state-of-the-art precast factory in Waldbröl, Germany.

Design and production processes are constantly being revised and refined to ensure an ongoing high standard of quality. All products must pass ongoing quality controls as with Buschbeck customer satisfaction is a top priority.

## Design and Safety

The two-shell construction of Buschbeck Outdoor Fireplace Grills allows them to be fired with either charcoal for barbecuing or with wood for the ultimate outdoor fire experience.

Buschbeck fireplaces don't need to be plastered or painted as the surface of the concrete is treated to ensure that it retains its good looks even after years of intensive use.

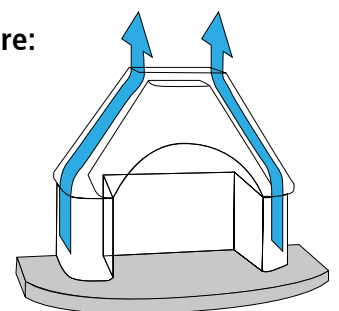

The special construction of Buschbeck outdoor fireplaces ensures a high level of safety as all parts of the stove that come into contact with the flames are made from refractory concrete, and air is constantly circulating between the outer skin and the five-part-furnace area.

### Buschbeck Outdoor Fireplace Grills Feature:

- Fully treated surface
- Twin skin design
- Made from refractory concrete
- Can be fired with charcoal or wood
- Contemporary design

Suitable for charcoal or firewood

Twin skin design makes the exterior cool to the touch

## Quality Control

All Buschbeck products pass stringent quality controls which also includes certification by TUV Rheinland Group. All Buschbeck outdoor fireplaces have been tested and hold TUV certifications.
