## open wood fires

Enjoy the warmth and ambience that only comes with a Heatmaster open wood fire

### The exciting benefits of Heatmaster Wood Fires:

Unique 5 sided heat exchange which uses 5 surfaces of the firebox to produce more convective heat into your home.

No gable required which significantly saves space to simplify installation.

Fully insulated firebox means no further insulation required, saving time and money.

Easy clean ashtray which you can slide out of the fireplace to remove ash, then just slide back in.

Australian owned company providing quality products, service and advice for over 25 years.
