metrofires

MetroFires by Pioneer

Metro is the result of 30 years of continual development in slow combustion technology. The design criteria for the Metro range of woodfires were to achieve exceptional performance and long life, presented in a compact and stylish form, at an affordable price.

Development and innovation didn't stop at the Metro; Pioneer's revolutionary water boosters overcome those ever increasing winter power bills for thousands of satisfied Metro owners.

Cad Cam technology is utilised by Pioneer in all stages of design and production, reducing costs while improving tolerances and efficiencies. This is reflected in Metro's ongoing rating as No.1 in independent efficiency tests, resulting in Metro's position as New Zealand's dominant brand woodfire.

With the advantages of clean design, robust construction, very close clearances to combustible surfaces and traditional style, the Metro "Rad" semi radiant wood fires offer unique features for the discerning buyer.

METRO WOODFIRES

RADIANT HEAT AND STYLING – The Radiant Series by Metro

Metro wood fires offer traditional styling in a wood fire. Featuring semi radiant design and offering radiant heat for large open areas, these fires work well in bigger and higher ceiling homes.

The Metro's design allows for minimal rear, side and front clearances, which is not often found on a semi radiant wood fire.

Available in 3 different model/size options ranging from the smallest 14kW Wee Rad to the massive 23.5kW Mega Rad, allowing a fire to suit most home designs.

Metro wood fires are finished in a high temperature metallic black paint. All fireboxes are made from 6mm carbon steel complete with refractory firebricks to give maximum efficiency, protection and life.

Trim kits are optional on the Wee Rad, but are standard in black on the Xtreme and Mega Rad with the option to upgrade in either gold or stainless steel.

All Metros come standard with a 5 year warranty on the firebox.

Black trim

Gold trim

Stainless Steel trim

Metro Wee Rad

Metro Wee Rad is designed for the homeowner who requires a compact, affordable fire, complete with style and performance to accommodate their needs.

The compactness and control of this fire make the Wee Rad the perfect choice for the smaller home, or holiday house. The Wee Rad has a cook top for heating and cooking meals and can accommodate Pioneer's optional Wetback system.

Colour/Trim options - Available in Metallic black paint finish as illustrated. Black trim kit is pre-fitted as standard with either gold or stainless steel trim as an optional upgrade.

Metro Xtreme Rad

Metro Xtreme Rad has a large firebox for the bigger home, this large semi-radiant fire combines the benefits of unique design & powerful performance, with the option of a 2 speed fan to boost heat circulation.

With a large cooktop, the Xtreme Rad is not only capable of heating your home, but can cook the family roast and has the option of heating your hot water.

Colour/Trim options - Available in Metallic black paint finish as illustrated. Black trim kit is pre-fitted as standard with either gold or stainless steel trim as an optional upgrade.

Metro Mega Rad

Metro Mega Rad is clearly the largest Metro semi-radiant and the biggest woodfire in the Metro family. As the name "Mega" suggests, this model is BIG with a cavernous 103 litre firebox and cook top to match.

Combine this size and capacity with unique design, close clearances to combustible surfaces and the option of a 2 speed fan, the Mega Rad becomes the clear choice for the larger home.

Colour/Trim options - Available in Metallic black paint finish as illustrated. Black trim kit is pre-fitted as standard with either gold or stainless steel trim as an optional upgrade.

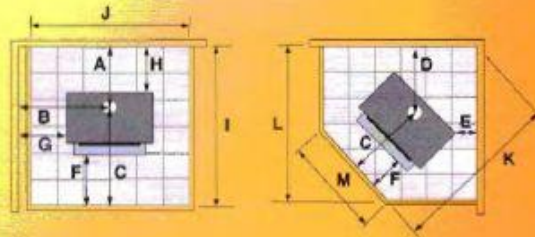

Installation Clearances & Specifications

All Metro woodfires comply with AS2918. Specifications may alter and those detailed within should be used only as a guide. Refer to the installation and operation manual supplied with every Metro, or if in doubt, consult your Metro retailer.

Metro Specifications mm						Wetback Heights
