

## NECTRE *Outdoor Pizza Oven*

Who better to be in a mood to party than to prepare really wonderful pizzas, tender meats or a very moist final bread at the new Nectre Outdoor Pizza Oven. The Nectre Pizza Oven features a large oven with a built-in stone, allowing some of the heat from the fire to enter the oven, giving a taste to traditionally wood fire products. The oven is large enough to accommodate your smoker and still provide an excellent cook. A wood fire can give to these steel coverings. Construction of stainless steel and mild steel. The Nectre Pizza Oven is designed to last. The frame is made from heavy plate stainless steel and will last a lifetime or more, which adds to the character of the oven. Installed on a bench top or with the optional support stand, the Nectre Pizza Oven is a great addition to your outdoor entertaining area!
