

NOBO

Glass Panel Heating

Sophisticated heating in a class of it's own

EVERY DESIGNERS DREAM

NOBO Safir is only 9mm thick and has a sophisticated simplicity. The range consists of three variants clear glass, mirror and polished black.

The **NOBO** Safir clear glass allows you to see through the heater, ideal to place in front of a window providing an uninterrupted external view. This variant is only available in horizontal version.

The stylish polished black gives a stunning effect, permitting many creative solutions in terms of use and location and is available in both horizontal and vertical formats.

The **NOBO** Safir mirror version, available in vertical only, is the perfect answer for halls, entrances and in particular providing a steam free mirror for bathrooms.

*Comfortable
temperatures and a
new look at the
forefront of design
technology*

NOBO

NOBO Glass Panel Heating

Technical Information

Clear glass • horizontal • floor mounted

NOBO Safir is made from two 4mm glass sheets joined together. The front of the rear plate has an invisible electrically conducting layer. This emits the heat, while the temperature distributes evenly over the whole of the panel. The front plate acts as an electrical and mechanical protection.

Mirror • vertical • wall mounted

Black • vertical • wall mounted

WALL MOUNTING

NOBO Safir can be wall mounted horizontally or vertically, using the appropriate brackets included. Easily dismounted for cleaning.

FLOOR MOUNTING

NOBO Safir can be supplied with Legs for floor mounting; either single or back to back.

CONTROL

NOBO Safir must be direct wired and controlled by a wall mounted thermostat, or other control system, e.g. a central operating control.

Orion EC512

Particularly suitable for control by the **NOBO 51**, **Orion EC512** & **NOBO TR36**.

NOBO 51

NOBO TR36

Black • horizontal • wall mounted

SAFETY CUT-OUT

NOBO Safir's resettable Safety Cut-Out, switches the heater off if anything is draped over it.

ELECTRICAL CONNECTION & INSTALLATION

Installation must be carried out by an authorised installer.

Model	Output Watts	Amps	Height	Length	Depth
