What is GreenSmart 2™

The GreenSmart™ 2 System is the most innovative collection of components, controls and technology that when combined provide an elegant, smarter and greener way to heat your home. The GreenSmart 2™ features include; GreenSmart 2 Remote Control, Smart Thermostat Mode, Remote Blower Operation, Accent Lighting*, Comfort Control™, Continuous or GreenSmart™ Pilot and Drop Down or Glide-Away™ Concealments Doors*.

The GreenSmart 2™ Remote is a remarkable controller allows you to run all features of the fireplace. In “Smart Thermostat Mode” the fire automatically adjusts the heat output based on the temperature setting you’ve chosen. This means the flame will modulate up/down as opposed to instantly shutting off/ on like normal thermostat. This conserves fuel, maximizes heating ability and offers a more even heat while extending the viewing pleasure of the fire.

The GreenSmart™ 2 Remote can be carried around the home and be wall mounted.

GreenSmart™ 2 Features

Thermostat / Manual Modes

The GreenSmart™ 2 system allows for the fireplace to be used in a manual mode whereby the home owner manually adjusts the flame height or in a choice of 2 thermostat modes described below:

‘On’ Thermostat Mode: Thermostat control setting turns the fire automatically ON and OFF to maintain a set temperature.

‘Smart’ Thermostat Mode: In ‘Smart’ Thermostat mode the flame will modulate from low to high, or high to low until the set temperature is reached. This will conserve fuel usage and extend the viewing pleasure of the fire. If the room temperature exceeds the thermostat setting, the unit will shut off until heat is required again. This is the most comfortable and efficient way to heat your home.

After choosing your temperature you may adjust the fan speed setting, including on or off, turn on or off your accent light and turn on or off your back burner (Comfort Control) depending on the season and your heating needs.

*Not available on all models

Comfort Control™ Features:

With the push of a button on the GreenSmart remote, the Comfort Control will turn off the rear burner while leaving the front burner on for an attractive flame appearance when less heat output is the priority. This feature not only ensures your comfort, but does not waste energy when less heat is desired.

Blower Operation:

With simple remote operation the blower can operate from either off to a choice of six speeds.

Accent Lights:

Accent Lights are standard features in all Lopi gas fireplaces.* This feature adds a warm glow to both the logs and optional firebacks and can be used when the fire is on or off. This is perfect as a night light or soft indirect light for the room, the Accent Light allows visual enhancement of your fireplace 365 days a year.

Accent Lights Shown with the 564HO GS Diamond-Fyre Burner

Continuous or GreenSmart™ Pilot:

This switch allows you to operate your fireplace in either continuous or GreenSmart™ modes. In continuous pilot mode you pilot stays on and is ideal during winter months when maintaining a warm flue to ensure a reliable operation. In GreenSmart™ Pilot mode, the pilot flame ignites via an intermittent (IPI) spark. It does not run continuously and thus conserves energy when the appliance is not being operated in the spring and summer. The GreenSmart™ system includes an automatic battery back-up, ensuring proper ignition even during power outages.

Glide-Away™ or Drop Down Concealment Door*

The control valve and wires are hidden by a concealment door to provide an elegant, more finished appearance. (Note Manual Operation)

Concealment door open

Concealment door closed

564 GS2
Direct Vent Gas Fireplace

Join the Lopi tradition by heating your home with the Lopi 564 GS2 gas fireplace. At Lopi we build only the highest quality fireplaces. Notice the detail and beauty in the log-set, the warm glowing fire and decorative faces available. The design of the Lopi 564 GS2 allows you to add the beauty of fire with a large viewing area while giving you control over the heat.

The huge turn-down rate makes the 564 GS fireplace ideal for smaller rooms such as bedrooms and dens and for those not needing a large amount of heat, but still wanting to enjoy a beautiful fire year-round.

The Lopi 564 GS can be tailored to your home. Choose from a huge selection of grills, faces, and fireback liners to create your own personalised look.

The 564HO GS2 - '4 Products in 1'
Create the look you desire with a burner and media option to suit any décor.

564 HO GS2 Direct Vent Gas Fireplace

The Lopi 564HO GS2 offers a choice of three different burner options; the high performance Ember-Fyre™ burner, the Dancing-Fyre™ burner or the contemporary Diamond-Fyre™ burner with a choice of Driftwood or Stones. The 564HO is sure to keep things warmed up year round with a heat output of 35Mj's and the ability to heat up to 158 square metres.*

This high efficiency fireplace offers a turn down ratio of up to 71% (NG) or 79% (LPG). The pyro-ceramic glass face enhances the radiant heat that ultimately warms the surfaces of your home helping assisting the high heating performance of this fireplace.

864 GS2 Direct Vent Gas Fireplace

The 864 GS is perfect for bigger rooms or as a beautiful, decorative fire all year long. It features a wide Mj turn down range for more heat flexibility and flame viewing options. A wide range of face styles and options are available to create a fire to suit you and your decor. The 864 GS features 864 square inches of viewing area.

You have virtually unlimited flame variation with our Comfort Control™ switch and the variable flame control. Use all 31Mj's of flame on the coldest winter nights or turn it down to only 7Mj (NG) or 5.5Mj (LPG) for a romantic firelight on a warmer night. You can enjoy a full flame fire with maximum height or use the variable flame control to turn the flames lower when you want less heat. Use the Comfort Control™ switch to turn off the rear burner completely for a darker, more romantic fire and less heat.

We Dare You To Compare!

The Lopi 864ST GS2 is not only one of the most realistic double sided gas fireplace in Australia, but is also a great heating option.

864ST GS2 Direct Vent Gas Fireplace

A home is a combination of dreams and choices, each a reflection of you. From the most intimate engraved details on a fireplace face to the grandest of fires, our fireplaces bring a sense of style to your home.

The 864ST GS maintains this tranquillity with a perfect balance between the firebox, logs and flames. The logs and fire have been carefully designed to give you a different look from either side. Compare the amazingly realistic nine piece log-set with any other see-thru fireplace on the market! The unique split-level Dancing-Fyre™ burner will give you a warm, yellow fire with glowing embers that your friends and family will have a hard time telling apart from a real wood fire.

The 864ST GS, a fireplace with two points of view. You can personalise each room using a different face on each side of the fireplace. Choose one of the standard grill sets or even choose one of the beautiful upgrade faces.

Lopi 864ST GS2 Specifications

Mj Input	Heating Capacity
39.5 Mj High 15.5 Mj Low NG 10.5 Mj Low LPG	Up to 135sqm*

Fireplace Set-up

After selecting your fireplace here is what to do next!

Choose your grill or face as well as fireback liner and media (if applicable) as seen on pages 12-15. Install your Lopi fireplace in the appropriate situation, some finishing examples are demonstrated below:

Non-Combustible Material Around the Firebox
In the above example a stone tile is applied over the firebox to create the finished look.

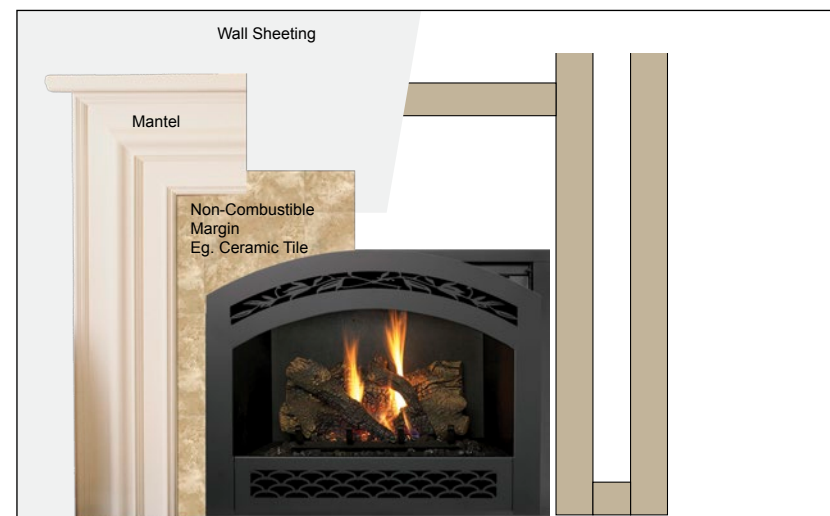

Required Finishing Options: Grills
Optional Finishing Options: Face (in lieu of grills), Fireback Liner, Glass Trim, Media (if applicable), Glass Trim

Finishing Trim Around the Firebox

In the above example a 4 sided Studio Trim is used around the firebox on a plasterboard wall to provide the finish.

Required Finishing Options: Grills, Studio Trim
Optional Finishing Options: Fireback Liner, Media (if applicable), Glass Trim

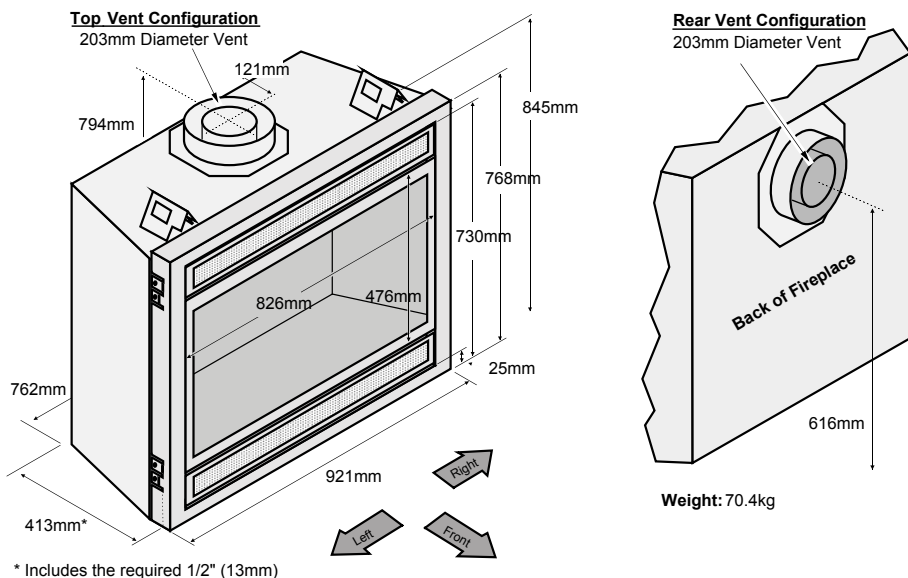

Mantel with Face Option Over the Firebox

In this example an optional face is used to cover the firebox, and a non-combustible tiled margin extends from under the face to under the mantel.

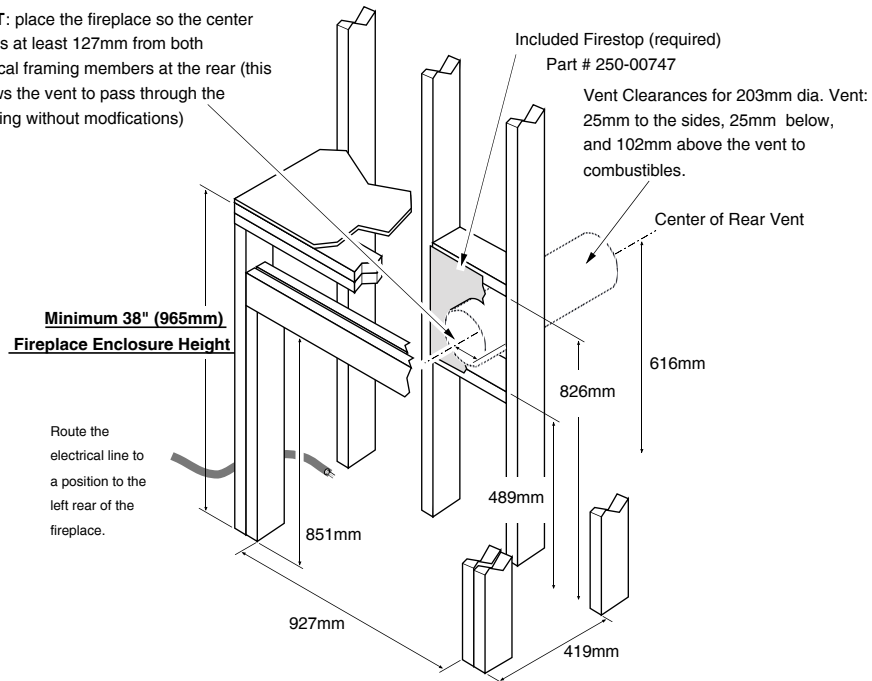

Required Finishing Options: Face
Optional Finishing Options: Fireback Liner, Media (if applicable), Glass Trim

Firebox Dimensions & Framing Details

564 GS2

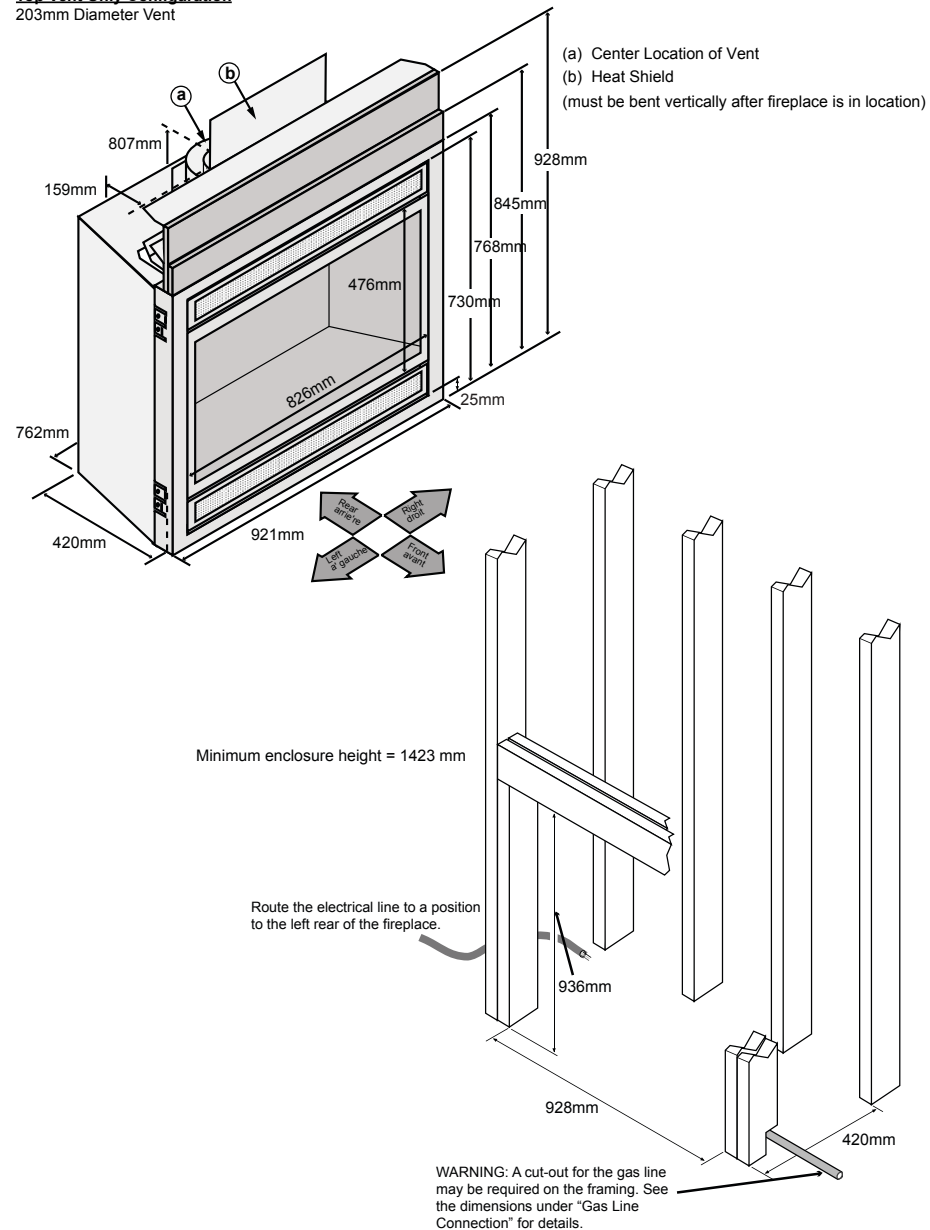

HINT: place the fireplace so the center line is at least 127mm from both vertical framing members at the rear (this allows the vent to pass through the framing without modifications)

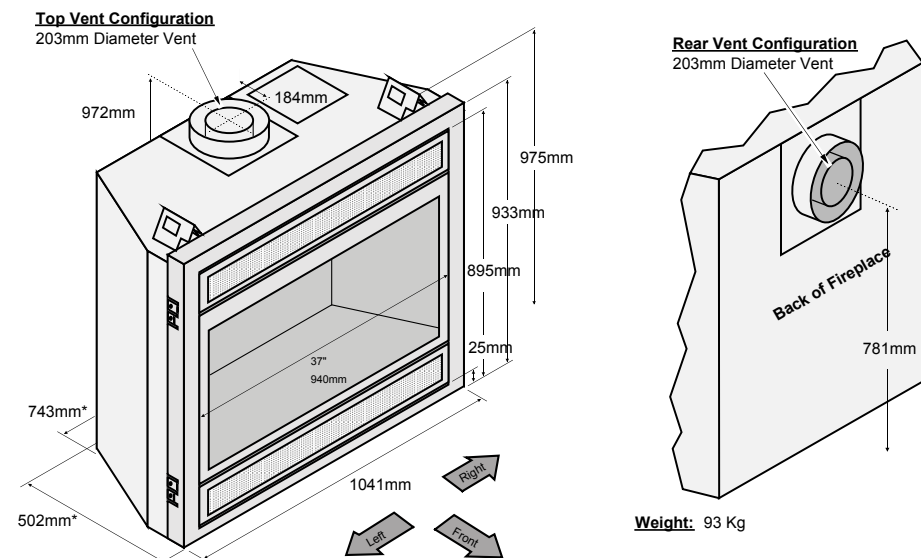

564HO GS2

Top Vent Only Configuration
203mm Diameter Vent

Firebox Dimensions & Framing Details

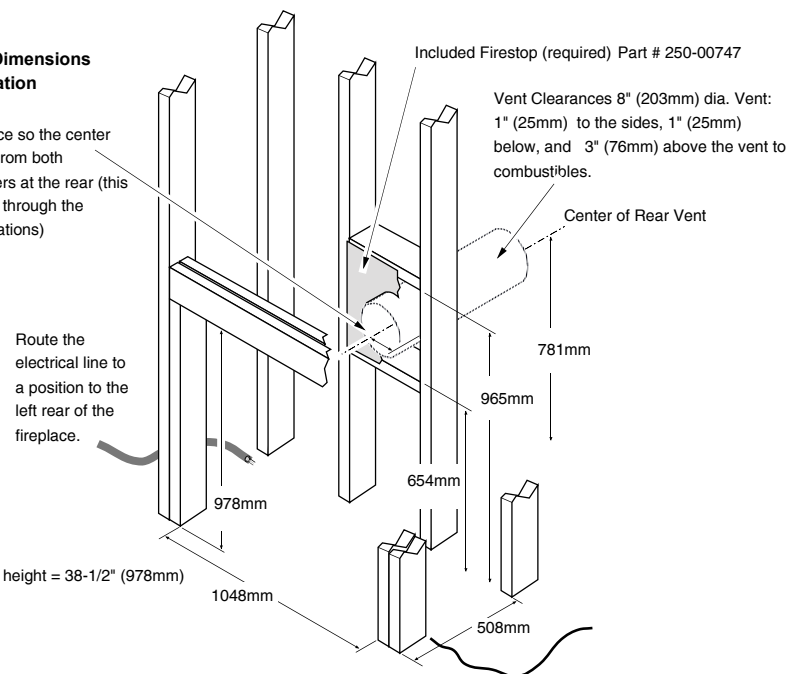

864 GS2

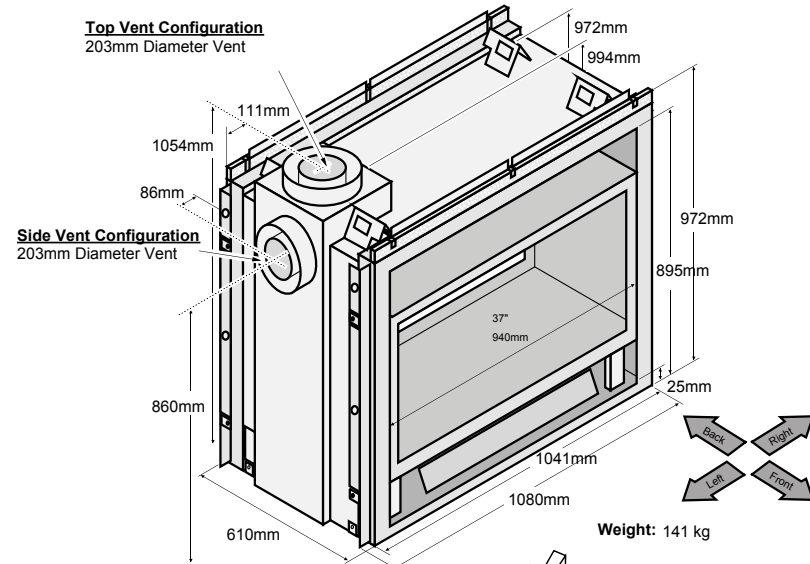

* Includes the required 13mm clearance.

Minimum Framing Dimensions Rear Vent Configuration

HINT: place the fireplace so the center line is at least 127mm from both vertical framing members at the rear (this allows the vent to pass through the framing without modifications)

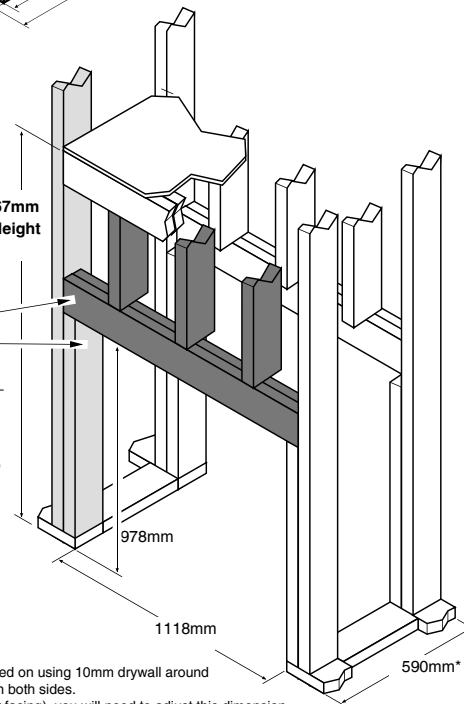

864ST GS2

Minimum 1067mm Fireplace Enclosure Height

NOTE:
The shaded framing must be installed after placing the fireplace in position.

The framing above the fireplace interferes with the top of the fireplace. If using the side vent configuration, do not install the framing to the left side (shown in light gray).

* The 590mm dimension is based on using 10mm drywall around the perimeter of the fireplace on both sides. If using thicker drywall (or other facing), you will need to adjust this dimension.

Finishing Options - *Lopi 564HO GS2 Model Only*

Studio Finishing Trim Dimensions

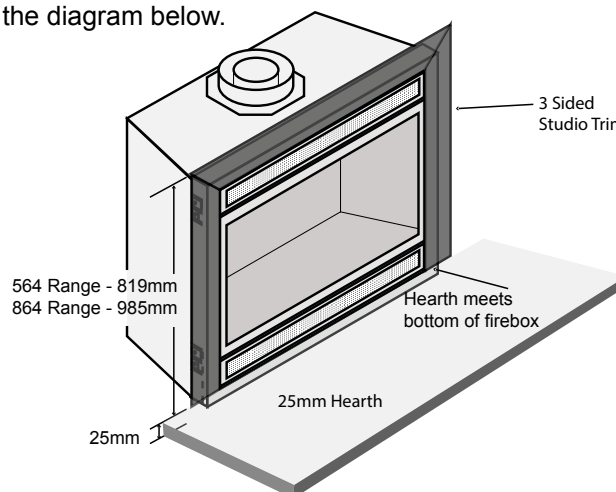

3 Sided Studio Trims

4 Sided Studio Trims

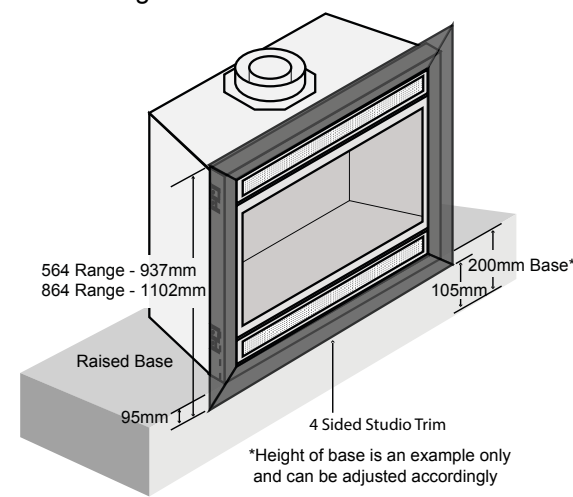

564 Range	Width	Height
3 Sided Studio Trim	1060mm	819mm
4 Sided Studio Trim	1060mm	937mm

864 Range	Width	Height
3 Sided Studio Trim	1175mm	985mm
4 Sided Studio Trim	1175mm	1102mm

The 3 sided Studio trims finish 25mm short of the base of the firebox allowing for a hearth to be pushed up to the firebox and meet the fascia as per the diagram below.

The 4 sided Studio trims finish 95mm below the base of the firebox. Please allow for this additional height when creating the raised base for the firebox.

Finishing Options - *Lopi 564, 864, 864ST GS2 Models Only*

Fireback Liners (Optional)

Fireback Liners can enhance the appearance of your firebox and can be introduced to suit your home decor. When used in conjunction with the accent lighting shadows or reflections can appear on the fireback liner, this is even effective when the fire is turned off!

Diamond Mosaic

Black Enamel

Stainless Steel

Stucco

Rock Creek

Basket Weave

Quilt

Handmade Brick

Standard - No Liner

Straight Brick

Herringbone Brick

As standard no fireplace ships with a fireback liner. A liner is optional only (except 564HO) Without a liner the finish is a non reflective black painted finish as seen above.

Media

All models (except 564HO) ship with the Dancing-Fyre™ Burner and a traditional log-set as standard. The 564 GS2 has the optional Birch log-set seen below.

564 GS2 Birch Log-set
