3615 HO GS2

Direct Vent Gas Fireplace

The Lopi 3615 HO GS2 is the smallest in the line-up of our linear fireplaces. It features a glass viewing area of over 850mm in width, with high dancing flames and under lighting that can be used whether the fire is on or off. The smaller dimensions of the 3615 make it suitable for smaller walls or room proportions.

The smaller size of the 3615 does not mean a low heat output. With a gas input of 35Mj/hr and ceramic glass for increased radiant heat this linear fireplace is not just for looks.

There is the option of 2 media types - a glass bed in a choice of 3 colours or you can add the optional Driftwood Twig and Stone Fyre-Art™. In addition to this you can choose between the black painted fire-back liner, black enamel, stainless steel or ledgerstone to further compliment this stunning fire.

4415 HO GS2
Direct Vent Gas Fireplace

The 4415 HO GS2 gas fireplace brings you the very best in home heating and style with its sleek, linear appearance and impressively high heat output. With a long row of dancing flames and built-in fans, the 4415 is not only an excellent heater but a beautiful focal point in your home. Turn on the under-lighting that shines through the translucent glass floor and you've got magic whether the fire is on or off. This sophisticated fireplace can accompany any architectural style with a selection of fireback liner options along with three media types.

6015 HO GS2 Direct Vent Gas Fireplace

The Lopi 6015 HO GS2 is the largest in the Lopi linear range of gas fireplaces. The 6015 features almost 1.5 metres of flame, beauty and heat!

With underlighting and optional Driftwood Twig and Stone Fyre-Art™, this fireplace will certainly be a focal point in your home as well as providing heating of up to 260sqm*. The 6015 can be turned down by over 50% to create a more subtle heat whilst maintaining an impressive flame.

Finishing Options

The linear range can be finished with a non-combustible tile/stone on the wall. Alternatively for a painted wall finish the entire wall can be applied with a non combustable wall lining and finished with a 50mm finishing trim which clips into place for a clean finish.

50mm finishing trim for use with non combustable wall lining

Tiled wall finish

Firebox & Minimum Framing Dimensions

3615 HO GS2

Note:
If a painted wall finish is required a non-combustible wall lining must be used in lieu of plasterboard. Please be advised that 'fire rated' plasterboard is not considered as non-combustible wall sheeting

** From base of firebox, add to this any raised base.

(a) The fireplace enclosure must be a minimum 1372mm tall (do not build into the fireplace enclosure)
See Installation Manual for full clearances
