

INTRODUCING

PATI-O-PEARL

Outdoor Fire Bowl

Pati-O-Pearl by Firefox is a 'designer' piece suitable for a number of outdoor applications.

It allows you to experience the warmth, charm and romance of a real wood burning open firepit.

For when you would prefer a little more convenience, a stainless steel bio-ethanol fuel burner is available as an option.

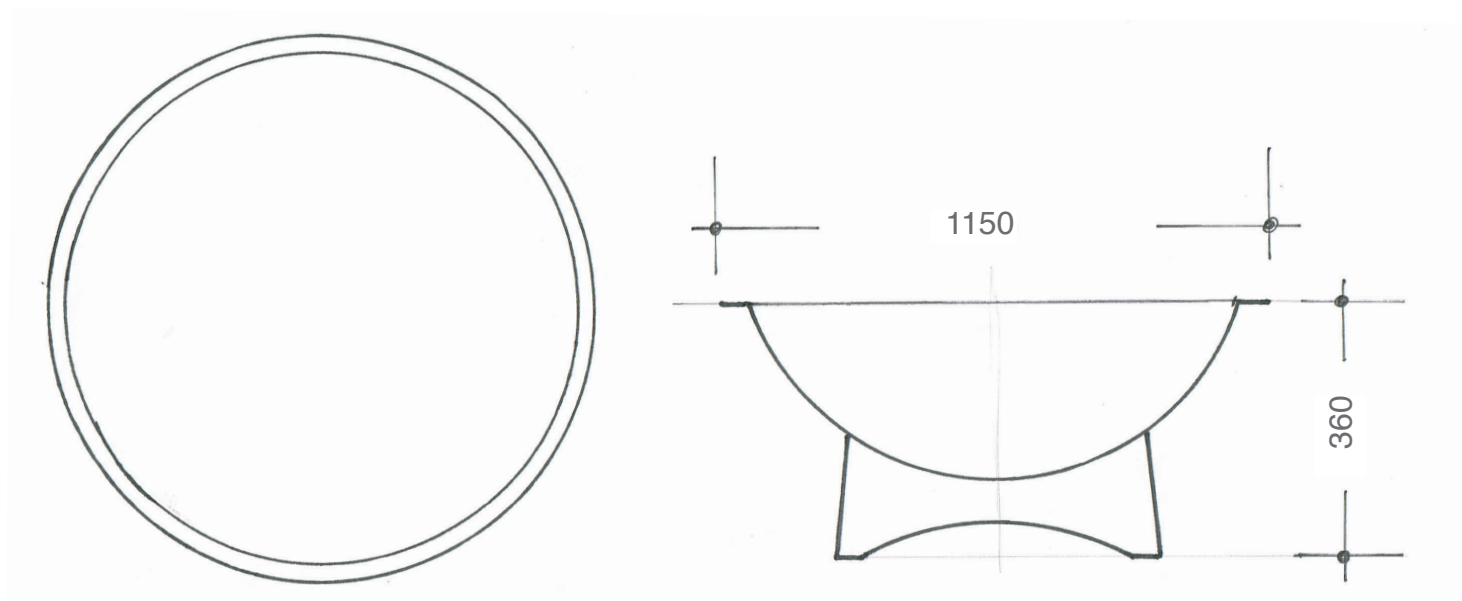

Alternatively, the bowl can be used to create a colourful 'water garden' feature.

Measuring 1155mm diameter and 360mm tall (including stand), Pati-O-Pearl makes a prominent feature. Over time, it will develop a naturally oxidised patina to enhance its appearance in any outdoor living area.

PATI-O-PEARL

PATI-O-PEARL

The Pati-O-Pearl bowl is manufactured from top quality P & O HA3 grade steel. It is supplied mill finish which is designed to weather over time.

The ethanol burner (optional item) is manufactured from top quality 304 grade stainless steel*.

The 'weathered' look of the bowl can be obtained sooner by applying a solution of spirit of salts diluted with water. Refer to the 'User Instructions' for guidelines.

Pati-O-Pearl is a registered trade mark of Firefox Industries Pty Ltd. All rights reserved. * Ethanol burner expected availability early-mid 2013. Firefox reserves the right to change product specifications without notice.
